DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 November 2008 has been entered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the figures.

Specification

4. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Application/Control Number: 10/699,142 Page 3

Art Unit: 2629

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-3, 5-11, 15-17, and 20-25, drawn to a liquid crystal display panel (claims 1-3) and a liquid crystal display device (claims 5-11, 15-17, and 20-25), classified in class 349, subclass 25 (e.g., light sensitive liquid crystal products).
- II. Claims 38-40, drawn to a method of manufacturing a liquid crystal display device, classified in class 438, subclass 30 (e.g., methods of manufacturing liquid crystal components).

The inventions are distinct, each from the other because of the following reasons:

6. Inventions II and I are related respectively as process of making and product made.

The inventions are distinct if either or both of the following can be shown:

- (1) that the process as claimed can be used to make another and materially different product or
- (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

Art Unit: 2629

(1) In the instant case, the process as claimed (*in claims 38-40*) can be used to make another and materially different product (*than that of claims 1-3, 5-11, 15-17, and 20-25*).

For example, the process as claimed (*in claims 38-40*) can be used to make another and materially different product (*than that of claims 1-3*) not including at least:

"a liquid crystal display panel," as claimed in independent claim 1 (line 1); and

"a second substrate connected to the first substrate, the second substrate facing the first substrate," as claimed in independent claim 1 (lines 8-9).

For example, the process as claimed (*in claims 38-40*) can be used to make another and materially different product (*than that of claims 5-11, 15-17, and 20-25*) not including at least:

"a liquid crystal display panel," as claimed in independent claim 5 (line 2);

"each of the sensing parts generating an analog signal including a location information in response to an incident light, the location information indicating a location where the light enters," as claimed in independent claim 5 (lines 5-7); and

"a control part receiving the analog signal and transforming the analog signal into a digital signal, the liquid crystal display device being controlled in response to the digital signal," as claimed in independent claim 5 (lines 8-10).

Art Unit: 2629

(2) In the instant case, the product as claimed (*in claims 1-3, 5-11, 15-17, and 20-25*) can be made by another and materially different process (*than that of claims 38-40*).

For example, the product as claimed (in claims 1-3) can be made by another and materially different process (than that of claims 38-40) without at least:

"a liquid crystal display device," as claimed in independent claim 38 (lines 1-2); and "combining the first substrate and the second substrate," as claimed in independent claim 38 (line 10).

For example, the product as claimed (*in claims 5-11, 15-17, and 20-25*) can be made by another and materially different process (*than that of claims 38-40*) without at least:

"forming a first substrate including a plurality of pixels and a plurality of sensing parts, each of the sensing parts having a light-sensitive switching device which is directly responsive to light and each of the sensing parts generating an output signal including a location information in response to an input signal, the location information indicating a location where the input signal is inputted," as claimed in independent claim 38 (lines 3-8);

"forming a second substrate," as claimed in independent claim 38 (line 9);

"combining the first substrate and the second substrate," as claimed in independent claim 38 (line 10); and

"forming a liquid crystal layer between the first substrate and the second substrate," as claimed in independent claim 38 (lines 11-12).

Application/Control Number: 10/699,142 Page 6

Art Unit: 2629

7. Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above <u>and</u> there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include

(i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to

petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

8. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. <u>All</u> claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Application/Control Number: 10/699,142 Page 8

Art Unit: 2629

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder**. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jeff Piziali whose telephone number is (571) 272-7678. The

examiner can normally be reached on Monday - Friday (6:30AM - 3PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Chanh Nguyen can be reached on (571) 272-7772. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
